

# CloudOracle Report

Generated on April 11, 2026 23:30 -04

## Executive Summary

Total findings: 38  
Current monthly cost analyzed: \$3120.00  
**Potential monthly savings: \$2287.50**  
**Potential annual savings: \$27450.00**

Severity: 24 HIGH, 14 MEDIUM, 0 LOW

## AI Analysis

Our recent AWS cost analysis reveals a significant opportunity for immediate financial optimization within our cloud environment. From a current monthly AWS spend of approximately \$3,120, we have identified potential monthly savings of \$2,287.50. This translates to an impressive annual savings potential of \$27,450, representing over 73% of our current expenditure that could be reallocated or saved, thereby directly improving our bottom line.

The analysis uncovered 38 distinct optimization opportunities, with the vast majority, 24 findings, classified as high severity, indicating substantial waste. The most impactful areas for savings are our EC2 compute instances, which account for \$1,185 per month in potential savings, followed closely by our RDS databases at \$832.50 per month, and EBS storage at \$270 per month. A recurring theme among the top individual findings is significantly oversized EC2 and RDS instances that are running with extremely low average CPU utilization, despite being active for extended periods.

To capture these substantial savings, we recommend prioritizing the immediate review and rightsizing of our underutilized EC2 and RDS instances. This involves a deeper dive into the specific database instances and compute resources identified as having extremely low CPU usage, validating their workload requirements, and scaling them down to more appropriate sizes. Following this critical first step, we should address the remaining EC2 and RDS findings, and then focus on optimizing EBS volumes. Implementing these changes will not only deliver significant financial benefits but also enhance the overall efficiency and cost-effectiveness of our cloud operations.

## Detailed Findings

| Severity | Resource ID  | Service | Type         | Cost/mo  | Savings/mo |
|----------|--------------|---------|--------------|----------|------------|
| Medium   | db-61021581  | rds     | db.r5.xlarge | \$360.00 | \$180.00   |
| Medium   | db-74cb7b02  | rds     | db.r5.xlarge | \$360.00 | \$180.00   |
| Medium   | db-ea3efaa1  | rds     | db.r5.xlarge | \$360.00 | \$180.00   |
| High     | i-1320884428 | ec2     | m5.xlarge    | \$140.00 | \$140.00   |
| High     | i-3883135494 | ec2     | c5.xlarge    | \$125.00 | \$125.00   |
| High     | i-679712942  | ec2     | c5.xlarge    | \$125.00 | \$125.00   |
| High     | i-3524680862 | ec2     | c5.xlarge    | \$125.00 | \$125.00   |
| High     | i-3592027508 | ec2     | c5.xlarge    | \$125.00 | \$125.00   |
| High     | i-4013005113 | ec2     | c5.xlarge    | \$125.00 | \$125.00   |

| Severity | Resource ID  | Service | Type        | Cost/mo  | Savings/mo |
|----------|--------------|---------|-------------|----------|------------|
| High     | i-2675083352 | ec2     | c5.xlarge   | \$125.00 | \$125.00   |
| High     | vol-2ff510d6 | ebs     | gp3-1000GB  | \$100.00 | \$100.00   |
| High     | vol-fcebf509 | ebs     | gp3-1000GB  | \$100.00 | \$100.00   |
| Medium   | db-db97a9ed  | rds     | db.r5.large | \$180.00 | \$90.00    |
| Medium   | db-41b2cee9  | rds     | db.r5.large | \$180.00 | \$90.00    |
| High     | i-3361376272 | ec2     | m5.large    | \$70.00  | \$70.00    |
| High     | i-3971128983 | ec2     | t3.large    | \$60.00  | \$60.00    |
| High     | i-1331333489 | ec2     | t3.large    | \$60.00  | \$60.00    |
| High     | i-1936196778 | ec2     | t3.medium   | \$30.00  | \$30.00    |
| High     | vol-72875d57 | ebs     | gp3-250GB   | \$25.00  | \$25.00    |
| High     | vol-9cd11fae | ebs     | gp3-250GB   | \$25.00  | \$25.00    |
| Medium   | db-64af4aab  | rds     | db.t3.small | \$30.00  | \$15.00    |
| Medium   | db-4ecea306  | rds     | db.t3.small | \$30.00  | \$15.00    |

| Medium   | db-f7dfc2b   | rds     | db.t3.micro | \$15.00  | \$7.50     |
| High     | i-4244916565 | ec2     | t3.micro    | \$7.50   | \$7.50     |
| High     | i-1358304553 | ec2     | t3.micro    | \$7.50   | \$7.50     |
| High     | vol-2c6f20ea | ebs     | gp3-50GB    | \$5.00   | \$5.00     |
| High     | vol-d4d2d352 | ebs     | gp3-50GB    | \$5.00   | \$5.00     |

## Recommended Actions

### 1. [Medium] db-61021581 (db.r5.xlarge) - Save \$180.00/month

Issue: RDS db-61021581 (db.r5.xlarge) has an average CPU usage of 8.2%. It is likely oversized.

Action: Consider downgrading to the next smaller RDS instance tier.

### 2. [Medium] db-74cb7b02 (db.r5.xlarge) - Save \$180.00/month

Issue: RDS db-74cb7b02 (db.r5.xlarge) has an average CPU usage of 1.6%. It is likely oversized.

Action: Consider downgrading to the next smaller RDS instance tier.

### 3. [Medium] db-ea3efaa1 (db.r5.xlarge) - Save \$180.00/month

Issue: RDS db-ea3efaa1 (db.r5.xlarge) has an average CPU usage of 0.8%. It is likely oversized.

Action: Consider downgrading to the next smaller RDS instance tier.

**4. [High] i-1320884428 (m5.xlarge) - Save \$140.00/month**

Issue: EC2 i-1320884428 (m5.xlarge) has an average CPU usage of 0.9%. It has been active for 209 days.

Action: Consider shutting down or terminating this instance. If necessary, consider a smaller instance type.

**5. [High] i-3883135494 (c5.xlarge) - Save \$125.00/month**

Issue: EC2 i-3883135494 (c5.xlarge) has an average CPU usage of 1.0%. It has been active for 16 days.

Action: Consider shutting down or terminating this instance. If necessary, consider a smaller instance type.

**6. [High] i-679712942 (c5.xlarge) - Save \$125.00/month**

Issue: EC2 i-679712942 (c5.xlarge) has an average CPU usage of 4.6%. It has been active for 15 days.

Action: Consider shutting down or terminating this instance. If necessary, consider a smaller instance type.

**7. [High] i-3524680862 (c5.xlarge) - Save \$125.00/month**

Issue: EC2 i-3524680862 (c5.xlarge) has an average CPU usage of 3.8%. It has been active for 104 days.

Action: Consider shutting down or terminating this instance. If necessary, consider a smaller instance type.

**8. [High] i-3592027508 (c5.xlarge) - Save \$125.00/month**

Issue: EC2 i-3592027508 (c5.xlarge) has an average CPU usage of 2.8%. It has been active for 325 days.

Action: Consider shutting down or terminating this instance. If necessary, consider a smaller instance type.

**9. [High] i-4013005113 (c5.xlarge) - Save \$125.00/month**

Issue: EC2 i-4013005113 (c5.xlarge) has an average CPU usage of 3.2%. It has been active for 311 days.

Action: Consider shutting down or terminating this instance. If necessary, consider a smaller instance type.

**10. [High] i-2675083352 (c5.xlarge) - Save \$125.00/month**

Issue: EC2 i-2675083352 (c5.xlarge) has an average CPU usage of 4.0%. It has been active for 257 days.

Action: Consider shutting down or terminating this instance. If necessary, consider a smaller instance type.

**11. [High] vol-2ff510d6 (gp3-1000GB) - Save \$100.00/month**

Issue: EBS vol-2ff510d6 (gp3-1000GB) is not attached to any instance. It has been orphaned for 332 days.

Action: Create a backup snapshot and delete the volume. If it does not contain critical data, delete it directly.

**12. [High] vol-fcebf509 (gp3-1000GB) - Save \$100.00/month**

Issue: EBS vol-fcebf509 (gp3-1000GB) is not attached to any instance. It has been orphaned for 60 days.

Action: Create a backup snapshot and delete the volume. If it does not contain critical data, delete it directly.

**13. [Medium] db-db97a9ed (db.r5.large) - Save \$90.00/month**

Issue: RDS db-db97a9ed (db.r5.large) has an average CPU usage of 7.7%. It is likely oversized.

Action: Consider downgrading to the next smaller RDS instance tier.

**14. [Medium] db-41b2cee9 (db.r5.large) - Save \$90.00/month**

Issue: RDS db-41b2cee9 (db.r5.large) has an average CPU usage of 6.0%. It is likely oversized.

Action: Consider downgrading to the next smaller RDS instance tier.

**15. [High] i-3361376272 (m5.large) - Save \$70.00/month**

Issue: EC2 i-3361376272 (m5.large) has an average CPU usage of 1.5%. It has been active for 351 days.

Action: Consider shutting down or terminating this instance. If necessary, consider a smaller instance type.

**16. [High] i-3971128983 (t3.large) - Save \$60.00/month**

Issue: EC2 i-3971128983 (t3.large) has an average CPU usage of 3.4%. It has been active for 359 days.

Action: Consider shutting down or terminating this instance. If necessary, consider a smaller instance type.

**17. [High] i-1331333489 (t3.large) - Save \$60.00/month**

Issue: EC2 i-1331333489 (t3.large) has an average CPU usage of 2.5%. It has been active for 235 days.

Action: Consider shutting down or terminating this instance. If necessary, consider a smaller instance type.

**18. [High] i-1936196778 (t3.medium) - Save \$30.00/month**

Issue: EC2 i-1936196778 (t3.medium) has an average CPU usage of 2.7%. It has been active for 173 days.

Action: Consider shutting down or terminating this instance. If necessary, consider a smaller instance type.

**19. [High] vol-72875d57 (gp3-250GB) - Save \$25.00/month**

Issue: EBS vol-72875d57 (gp3-250GB) is not attached to any instance. It has been orphaned for 320 days.

Action: Create a backup snapshot and delete the volume. If it does not contain critical data, delete it directly.

**20. [High] vol-9cd11fae (gp3-250GB) - Save \$25.00/month**

Issue: EBS vol-9cd11fae (gp3-250GB) is not attached to any instance. It has been orphaned for 292 days.

Action: Create a backup snapshot and delete the volume. If it does not contain critical data, delete it directly.

**21. [Medium] db-64af4aab (db.t3.small) - Save \$15.00/month**

Issue: RDS db-64af4aab (db.t3.small) has an average CPU usage of 4.6%. It is likely oversized.

Action: Consider downgrading to the next smaller RDS instance tier.

**22. [Medium] db-4ecea306 (db.t3.small) - Save \$15.00/month**

Issue: RDS db-4ecea306 (db.t3.small) has an average CPU usage of 4.4%. It is likely oversized.

Action: Consider downgrading to the next smaller RDS instance tier.

**23. [Medium] db-4193998b (db.t3.small) - Save \$15.00/month**

Issue: RDS db-4193998b (db.t3.small) has an average CPU usage of 5.8%. It is likely oversized.

Action: Consider downgrading to the next smaller RDS instance tier.

**24. [Medium] db-a0b60a2b (db.t3.small) - Save \$15.00/month**

Issue: RDS db-a0b60a2b (db.t3.small) has an average CPU usage of 3.7%. It is likely oversized.

Action: Consider downgrading to the next smaller RDS instance tier.

**25. [Medium] db-2cd3bde5 (db.t3.small) - Save \$15.00/month**

Issue: RDS db-2cd3bde5 (db.t3.small) has an average CPU usage of 0.2%. It is likely oversized.

Action: Consider downgrading to the next smaller RDS instance tier.

**26. [Medium] db-2a5ced51 (db.t3.small) - Save \$15.00/month**

Issue: RDS db-2a5ced51 (db.t3.small) has an average CPU usage of 2.7%. It is likely oversized.

Action: Consider downgrading to the next smaller RDS instance tier.

**27. [High] i-2476071338 (t3.small) - Save \$15.00/month**

Issue: EC2 i-2476071338 (t3.small) has an average CPU usage of 0.5%. It has been active for 204 days.

Action: Consider shutting down or terminating this instance. If necessary, consider a smaller instance type.

**28. [High] i-1175354575 (t3.small) - Save \$15.00/month**

Issue: EC2 i-1175354575 (t3.small) has an average CPU usage of 4.5%. It has been active for 169 days.

Action: Consider shutting down or terminating this instance. If necessary, consider a smaller instance type.

**29. [High] i-1258069264 (t3.small) - Save \$15.00/month**

Issue: EC2 i-1258069264 (t3.small) has an average CPU usage of 4.7%. It has been active for 110 days.

Action: Consider shutting down or terminating this instance. If necessary, consider a smaller instance type.

**30. [High] i-3253009857 (t3.small) - Save \$15.00/month**

Issue: EC2 i-3253009857 (t3.small) has an average CPU usage of 4.2%. It has been active for 44 days.

Action: Consider shutting down or terminating this instance. If necessary, consider a smaller instance type.

**31. [High] vol-990e4211 (gp3-100GB) - Save \$10.00/month**

Issue: EBS vol-990e4211 (gp3-100GB) is not attached to any instance. It has been orphaned for 364 days.

Action: Create a backup snapshot and delete the volume. If it does not contain critical data, delete it directly.

**32. [Medium] db-0093aa55 (db.t3.micro) - Save \$7.50/month**

Issue: RDS db-0093aa55 (db.t3.micro) has an average CPU usage of 3.5%. It is likely oversized.

Action: Consider downgrading to the next smaller RDS instance tier.

**33. [Medium] db-995a3acb (db.t3.micro) - Save \$7.50/month**

Issue: RDS db-995a3acb (db.t3.micro) has an average CPU usage of 8.6%. It is likely oversized.

Action: Consider downgrading to the next smaller RDS instance tier.

**34. [Medium] db-f7dfc2b (db.t3.micro) - Save \$7.50/month**

Issue: RDS db-f7dfc2b (db.t3.micro) has an average CPU usage of 7.1%. It is likely oversized.

Action: Consider downgrading to the next smaller RDS instance tier.

**35. [High] i-4244916565 (t3.micro) - Save \$7.50/month**

Issue: EC2 i-4244916565 (t3.micro) has an average CPU usage of 3.9%. It has been active for 162 days.

Action: Consider shutting down or terminating this instance. If necessary, consider a smaller instance type.

**36. [High] i-1358304553 (t3.micro) - Save \$7.50/month**

Issue: EC2 i-1358304553 (t3.micro) has an average CPU usage of 3.2%. It has been active for 195 days.

Action: Consider shutting down or terminating this instance. If necessary, consider a smaller instance type.

**37. [High] vol-2c6f20ea (gp3-50GB) - Save \$5.00/month**

Issue: EBS vol-2c6f20ea (gp3-50GB) is not attached to any instance. It has been orphaned for 231 days.

Action: Create a backup snapshot and delete the volume. If it does not contain critical data, delete it directly.

**38. [High] vol-d4d2d352 (gp3-50GB) - Save \$5.00/month**

Issue: EBS vol-d4d2d352 (gp3-50GB) is not attached to any instance. It has been orphaned for 188 days.

Action: Create a backup snapshot and delete the volume. If it does not contain critical data, delete it directly.
